

AMRI

Founded in 1991 as Albany Molecular Research, Inc., AMRI (NASDAQ: AMRI) provides scientific services, products and technologies focused on improving the quality of life. The company has steadily evolved, with global facilities now in the US, Europe and Asia. AMRI performs services including drug discovery, pharmaceutical development, and manufacturing of active ingredients and pharmaceutical intermediates for many of the world's leading healthcare companies. A separate, stand alone R&D division of the company is also developing technology that it intends to partner and out-license, an area often viewed as a higher value added service to the many companies with which AMRI is working.

Areas of Expertise: Discovery Services, Chemical Development, Analytical Services, Research and Development
